

IS THIS YOU?

Confused by all the different choices you have. The trade papers have ads for many programs, all claiming to be easy to use and the best of them all.

Feeling pressured to make a decision about which computer program to use for your business. Each day you delay means more paperwork.

Worried that the wrong choice could cost you thousands of dollars. Cash is a little tight, but leases are too restrictive. Other bills are due, too.

Heard horror stories from others about computers. Yet you know that when done right, computers can really be great. The whole world is using them, so why aren't you?

DATOW Software offers what just might be the answer to all these concerns. Our Rent-To-Own plan allows you to get up and running fast with a small financial commitment. Unlike other companies, we are willing to “put our money where our mouth is.” If you are not satisfied, you can just stop paying the monthly rental fee. And if you are satisfied (we believe you will be), your rent is applied to your purchase so you are not wasting money.
